Summary

Front-End Web Developer with experience in art and design. Earned a Full Stack certificate from the University of North Carolina Charlotte. Experience using the MERN stack to create applications. A problem-solver and passionate about user friendly web design and development. With each project produced, looking to engage the user and create something aesthetically pleasing. Excited to leverage these skills in the future as part of a fast-paced, quality-driven team in order to build better experiences for users.

Technical Skills

Languages: HTML, CSS, Javascript, jQuery, Moment.js, MySQL, NoSQL
Applications: VisualStudio Code, MySQL Workbench, Node.js, Git, Github, MongoDB, React, Express

Projects

Project_opus_1 | github.com/AJFree458/Project_opus_1 | ajfree458.github.io/Project_opus_1
- The project was created to find events, specifically concerts, determined by geolocation.
- Created functions to retrieve weather information, help with determining the UI of the application.
- Created using HTML, CSS, Javascript, jQuery, and Moment.js

Project_2 | github.com/AJFree458/Project-2 | project2-volunteer.herokuapp.com/
- A Node.js application to help volunteers to choose volunteer events to attend, nominally for a church
- Created html for the app, and routes. Set up the server file, and set up the deployment for the app
- Created using Sequelize, MySQL, HTML, CSS, Javascript, Node.js, and Heroku.

RecipeBox | github.com/ecorreale/RecipeBox| recipeboxclt.herokuapp.com/
- A React app to save and display recipes
- Created the database schema and back-end work for the server
- Created using the MERN stack.
